

JKR INTERNATIONAL

Container Bags / Container Liner

- Container bags are mainly designed for transportation of large quantities of flowable materials.
- Fillers match every standard ISO container- 20 ft, 40 ft.
- Designed according to customers' needs (filling spouts, etc.)
- Discharged by means of vents, cutting the front side of the container filler or even by suction.
- Provide optimal protection of the product and custom designed.
- Easy to install (less than 10 minutes)
- Increase capacity and cut down on the cost.
- Light-weight (20 ft filler = 8kgs.)
