

JKR INTERNATIONAL

- All of our recycling products can be printed or embossed to display bespoke customer designs such as logo and instructions for contents allowed.
- Printed front panel is particularly useful to show what waste 'CAN' and 'CANNOT' be filled inside the bag.
- These bags are used by the household mainly in the European and Australian city councils to give it to the citizens of respective areas . People collect bio-degradable garden waste.
- These bags are specialized for the collection of green waste. Durable and easy to store these bags score high as opposed to wheeled bins. They allow the green waste to breathe, owing to the perforated weaves typically found in such bags.
- Garden waste bags are available in various sizes ranging from 50 liters up to 200 litres, the standard being between 90 and 120 liter bags.
- These bags are made with heavy base to stop the blowing away by strong wind . It is one of the innovative way to look at the product from thick green ultraviolet treated fabrics and come with the option of printing your text details or any other information that you require.
